

SaniTrin™

To avoid spreading of pathogens and water contamination.

*Collect.
Remove.
Clean.
Reuse.*

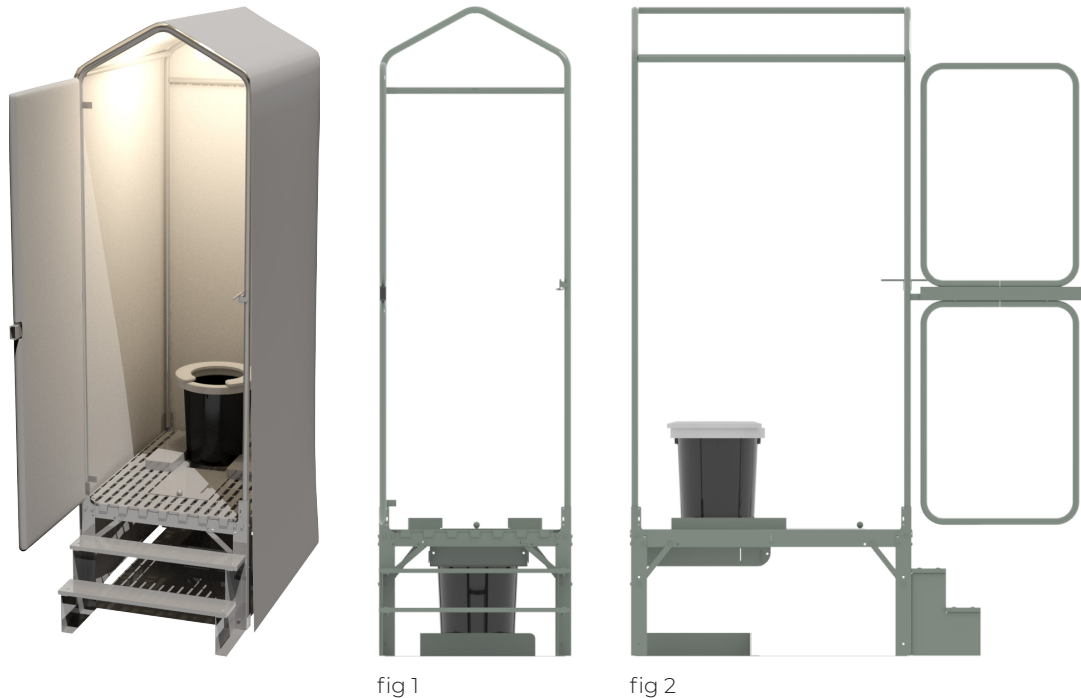

fig 1

fig 2

SaniTrin™ is an easy but solid solution that offers a flexible latrine in areas where water is of shortage.

The construction makes it possible to have both a solution where the user can stand [fig 1] or sit [fig 2].

Easy to ship, put together and disassemble.

Cleaning by Sanitisation

By SaniTrin™ kit

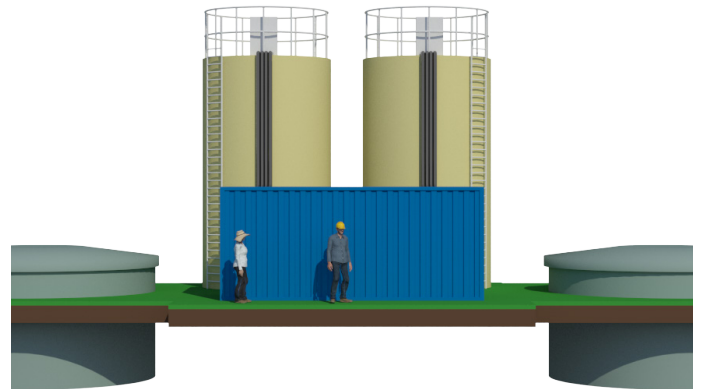

Adding a mix of Urea and Bacteria directly in the bucket.

Leave for 1-6 months depending on the outdoor temperature.

By SaniC™ system solution

Sanitisation by aerobic treatment process; 7-14 days depending on outdoor temperature in SaniC™ treatment plant.
